

## Assignment 2 – Individual component

---

This part of the assignment counts for **5%** of the module mark.

Your work should quote your student ID, but not your name (or the names of team members) to allow for anonymous marking. Make sure to reference any sources that you refer to and be aware that the assignment will be submitted to TurnItIn UK.

---

One aim of the module ST404 is to help you develop skills which employers look for in graduates, including the ability to analyse and reflect on team work processes and outcomes, the effectiveness and functionality of a team and your own contributions towards a team.

Skills that you may have developed further as part of the module include

- making contributions to a group project;
- working collaboratively with others;
- leading a team and motivating others;
- participating in problem solving and decision making as a group;
- communication in a multi-national group.

---

Produce a piece of reflective writing (1000 words  $\pm$  10%) on your team work experience as part of ST404. Describe, critically discuss and reflect on what you have learned. This should be a personal account discussing any feedback that you received from your team members and reflecting on how you felt. Try to describe events accurately and honestly, but avoid moralising about people's behaviour. Do not identify individuals by name or nationality. You can find further guidance on reflective writing on Moodle in the section for Week 6. You are encouraged to use literature on teamwork, appropriately referenced, to support your discussion.

### **Marking criteria:**

Use of language

Clarity

Structure

Depth of critical reflection, drawing on specific experiences and relating them to broader themes.
